EXCLUSIVE Peace Hope Better, Scientist Believes

Knowledge Both Sides Newly
Armed Is A Deterrent, Orr Says

Lord Boyd Orr, winner of the Nobel Peace Prize for 1940 tells in the following dispatch his views on war and peace and especially the possible effects of atomic bombs and biological warfare.—EDITOR.

By Lord Boyd Orr
Nobel Peace Prize Winner 1940.
(Written for Bulletin by Special Press)

BRECHIN, Scotland, Oct. 14.—(UP)—The fact that both sides are armed with new weapons invented in the last few years will help prevent war.

Those in power know that a war with atomic bombs and biological weapons would cause widespread death and destruction followed by political convulsions from which few of them would remain in power or even alive.

No government will willingly declare war. The danger is that in the present cold war, the armament race and propaganda stirring up fear and hatred will create an inflammatory political atmosphere in which some otherwise trifling incident will flare into a world war.

The road to peace lies through co-operation of governments and

concrete measures of benefit to all. Political conflict, either national or international, is largely an appeal to emotion.

In business, people get down to concrete realities and reach agreement on the basis of the facts instead of interminable debates on ill-defined political abstractions.

It was to this end that in 1940 when director general of the FAO (Food and Agricultural Organization), I submitted proposals for a world food board through which the nations would co-operate to double world food production in the next 20 years with stabilized prices in the international food markets at levels fair to producers and consumers.

The majority of governments were willing to co-operate. The United States approved and moved a motion to set up a commission to get it going but one or two had no enthusiasm for it.

Both the political and economic positions in the world have deteriorated since 1940 because some governments are more concerned with their immediate interests than with the contribution they can make to world peace and prosperity upon which the fate of all nations depends.

Let governments begin to dis- pose of business instead of politics. Let them consider joint action in plain life. Let them consider joint action in plain life. Let them consider joint action in plain life.

Let people of all nations get together through international organizations such as Federal Union, the League for World Government, the Peace Union, the Women's League for Peace and Freedom; and let them invite delegates from all countries, including Russia, so that the voice of the people of the world can be heard strengthening every movement for world unity, giving all peace-loving governments the courage needed to take the lead in the march of mankind to a future of world unity, prosperity and peace, which is only alternative to a war in which our civilization would be committed.

Lloydminster showed us a completely new type of oil field, but it remained for Myrman to close up the school, roll in everyone from miles around, and give us the most tumultuous reception of the two-day goodwill mission.

President H. C. Chapman, of Lloydminster Board of Trade, and Mayor R. L. Shaw were boasting when they told us Thursday night about their oil industry, based on the largest black crude oil field on the coast.

It's a lot different from Leduc, Redwater, or any of Alberta's other producing regions. We toured the Blackfoot area, where wells are on 10-acre blocks. Because each well has a pump-house and storage tank, the whole aspect is any eye-convener for Edmontonians.

Government supervision has resulted in elimination of haphazard well-drilling. Pump-houses and storage tanks are lined up along the coast.

SIGN IS NEW; ERROR IN GRAMMAR SAME

GALT, Oct. 15.—(CP)—Something new in traffic signs has appeared on Highway No. 24 just west of Galt. "Drive slow. Deer crossing."

On each side of a two-mile section of highway is heavy brushland and herds of deer, numbering as many as 25, have been seen crossing the road in the early evening.

POLICE ESCORT ACCUSED IN SLAYING

HANDCUFFED and shuffling face with widebreaker as he is led to city police court-room today is Hong Suey Chin (centre). Oriental, one of two charged with murder of Sam Koo, flanked by Constable Bill Fedorak (left) and Const. Jim Pollock. Other man charged in slaying is Joseph Gilbert.

2 Men Charged Here With Slaying Chinese

Reds Border Hong Kong: British Arm

Demonstration of Force on Sunday Planned in Colony

By ARTHUR M. COUL
United Press Staff Correspondent

HONG KONG, Oct. 15.—(UP)—The Chinese Communist forces occupied the heart of Canton today and to the south raised a five-starred red banner directly across the Hong Kong crown road from the Union Jack.

The Communist underground pushed toward the Hong Kong border from Shikung, 44 miles to the north.

The 40,000 British troops to Hong Kong went on a foot march to the Communist line, and the Communist line moved closer to the Crown colony.

Accused Bruised From Night Battle

Two city men, one captured after a fierce night-time battle with city police detectives, were charged in police court today with the week-old slaying of Sam Koo, Chinese city market gardener.

They were Hong Suey Chin, last known address 12510 Fort Trail, and Joe Gilbert, of 9816 96A street.

Charged before Magistrate A. I. Millar, the pair were remanded without plea to October 21.

Chin was brought to police station by a cordon of RCMP officers from K division barracks, where he was being held.

Handcuffed to Constable J. Muir, Gilbert was led into the premises, court, where he was joined by Chin. Both men were flanked by police constables.

FACE BORE MARKS
Gilbert, who was captured last night after a fierce battle, bore marks of the recent conflict. His face was badly cut and puffed.

A packed courtroom heard the court reporter read joint charges of murder against the pair.

Gilbert was still apparently rattled from his capture at the CNR station last night.

He wore only a dirty pair of black trousers, no shoes and no shirt. The upper half of his body was garbed in grey flannel, long-sleeved underwear.

As Chin was led into the courtroom, he shuddered his face with a well-worn leather windbreaker, thwarting newspaper photographers.

Neither of the men's faces betrayed any emotion while the case was laid.

SEES MOTHER
A trace of uneasiness flitted across Chin's face as he nodded to his 31-year-old mother who was sitting in the crowded spectators' gallery.

Other than that, the aged, placid look on the oriental's face was unbroken.

The courtroom scene was the culmination of a five-day search for the slayers of Sam Koo.

Chin was arrested in his trailer home near North Edmonton at about 9:30 p.m. 41 minutes after Gilbert was taken in a police trap near the CNR depot in downtown Edmonton.

SUBMITTED QUIETLY
Chin submitted quietly to arrest as he sat with his wife in their home but Gilbert fought with all the fury of a trapped animal before being finally handcuffed.

Arrested following a "tip-off" furnished by a party who parties police officers to make it this time, five days of unrelenting work by every member of the detective department.

Police officials said Chin had been acquainted with the murdered man, Koo, whose body was found last Sunday morning on the floor of his room house in North Edmonton.

Both accused are married and Gilbert is the father of a one-month-old baby.

HARDEST STRUGGLE
Detective-inspector Bert Petheram said the struggle to subdue Gilbert was one of the hardest in all his experience as a police officer.

Six officers, headed by Inspector Petheram and Det. Sgt. James Peterson, had formed a cordon round an automobile containing Gilbert when he was parked just south of the old CNR station west of 101st street.

Inspector Petheram and Sgt. Peterson had trailed the automobile since it was seen entering it from a 10th street. The car had travelled by a back lane.

6 City MLAs Seen Possible

Proposal that Edmonton should have six instead of five legislative representatives will be discussed at a public meeting here Wednesday.

The meeting will be held at the committee room of the legislative building, beginning at 10 a.m.

Delegations and persons wishing to discuss the proposal with members of the government's redistribution committee will be heard at the meeting.

A redistribution committee was appointed at the last regular session of the Legislature to study recent population shifts in the province and make suggestions for constituency boundary changes so that legislative representation is placed on a basis of equality.

The committee will hold a public meeting in Lethbridge on Monday and in Calgary on Tuesday.

Large Litter of 10 Puppies

was born to terrier belonging to N. A. Marchukhynd of 10050-88 street a week ago. Growing stronger daily, 10 little puppies came as quite a surprise to owner of terrier. Owner, owner, owner, is four to five for terrier.

Rajk, 2 Aides Put to Death

BUDAPEST, Hungary, Oct. 15.—(UP)—László Rajk, once Hungary's No. 8 Communist, and two other men, were hanged at dawn today for crimes pinned on them in one of the biggest Communist treason cases since the Moscow purge in 1950.

Dr. Viktor Barnai, and Address shall went to the gallows with Rajk, a former Hungarian foreign minister and now defendant in the trial before a Budapest military court which ended Sept. 24.

The foreign minister announced the death sentences gives three of the eight defendants were carried off at 6 a.m. 130 p.m. Edmonton times.

The defendants were charged with conspiring with Marshal Tito and American agents to overthrow the Communist regime of Hungary.

In addition to the three death sentences, two defendants were sentenced to life imprisonment, another to nine years, and two army officers were remanded for court martial.

The executions followed by a single day the confirmation of the sentences by the Budapest Court of Appeals.

Three-Way Talks Ideal of Industry

Industrial Relations Chief Outlines Scheme To AFL

By Erwin Frick

LETHBRIDGE, Alta., Oct. 15.—(CP)—The ideal labor convention of the future will have labor, management, and government officials sitting side by side, the Alberta Federation of Labor was told yesterday.

Lloyd Is Proud Of Oil Field

(Continued from Page 1)

roads to make things easier for farmers working the land surrounding it. "I've been here for 15 years and I've seen the oil field grow from a trickle to a flood," Lloyd said. "I'm proud of it."

Lloyd Is Proud Of Oil Field

(Continued from Page 1)

All the heavy black crude is trucked to Lloydminster, because it's too heavy to deliver through pipelines. Sand and water content is high, with the result that both refineries use special facilities for treating crude was enough to move from case operation to another in the fracturing process.

Lloyd Is Proud Of Oil Field

(Continued from Page 1)

No gasoline is marketed in the Lloydminster operation. Asphalt and fuel oil are produced, but refineries are running at only part capacity because available market is limited here. Possibility of the U.S. market being opened to Lloydminster products is indicated in last week's first shipment to Montana. Operators are hopeful it is only the start of an increasing export business.

Lloyd Is Proud Of Oil Field

(Continued from Page 1)

Seems a farmer came to town to buy an oil burner and put in a tank of fuel oil, "tramping the town in vain for anyone who could handle his needs." "Nevertheless, this happened in Lloydminster," said George. "The important thing is that Lloydminster was up to the fact that it can help itself by helping the community it supposedly serves."

Two Arrests In Murder Here

(Continued from Page 1)

route to where it was parked by the end of the old CN station. DRIVER RELEASED

Two Arrests In Murder Here

(Continued from Page 1)

Driver of the car, described as a friend of Gilbert, was released by police after a brief questioning. Police said they were convinced he had nothing to do with the North Edmonton slaying.

Two Arrests In Murder Here

(Continued from Page 1)

Inspector Petterson described the capture of Gilbert: "From information we obtained we had been on the lookout for the two men who were arrested. We got it from a citizen that Gilbert was in a restaurant on the west side of 101 street near 100 avenue."

Two Arrests In Murder Here

(Continued from Page 1)

Gilbert got into a car and we followed it. We parked our car east of 101 street after the car was parked close to the CNR locomotive building near where excavation for the new freight sheds is going on.

Two Arrests In Murder Here

(Continued from Page 1)

"We waited for about 15 minutes while the men in the car talked. When a pre-arranged flashlight signal was flashed from the box of the locomotive building, Gilbert got out of the car."

Two Arrests In Murder Here

(Continued from Page 1)

"As he stepped out, Det. Stevenson saw him. Without saying a word the man smashed Stevenson in the face. The two closed and soon we were all in a mauling on the ground."

Two Arrests In Murder Here

(Continued from Page 1)

Inspector Petterson said Det. Stevenson suffered the only injury of consequence in the three struggles—a very sore eye from the blow he took by Gilbert."

Two Arrests In Murder Here

(Continued from Page 1)

"A short time later the car was arrested in his home by Detective Const. Hooper, J. L. Jack, Langford and Benny Wheatfield."

Two Arrests In Murder Here

(Continued from Page 1)

ARMED WITH KNIFE The citizens said this had a butcher knife in his hand when he walked into his trailer home but he had been using it with his evening meal. Knife was immediately taken by Det. Hooper. Gilbert was unarmed at the time of his arrest.

Two Arrests In Murder Here

(Continued from Page 1)

Police records reveal Chin was fined \$30 and costs two days ago in police court on a charge of illegal possession of liquor. Gilbert was unarmed at the time of his arrest.

Worker in Sewer Buried Under Mud

Is Unconscious When Rescued; Internal Injuries Suffered

One man is in hospital here with a rib fracture and possible internal injuries after having been buried for several minutes under hundreds of pounds of mud in a sewer excavation.

Injured was Rene Perreault, 27, of 136 street and 115 avenue, who was at a sewer excavation at the rear of 1123-128 street.

Perreault entered the ditch yesterday afternoon to check the depth of a ditching machine. The ground gave away, knocking him down and burying him under wet clay and mud.

Fellow workers including Larry Steedman, Harry Kruper, 10434, 70 avenue and Rusty Tumber, 802-110 avenue, operator of the ditching machine, tried to dig Perreault to the surface after several minutes. He remained unconscious shortly before being taken to hospital by Smith's ambulance.

News Here For Parley

Routine business matters were being discussed at a meeting of the Alberta section of the Canadian Weekly Newspapers' Association at Macdonald hotel.

Ken Patrice, Camrose Canadian, took over the secretariatship of the organization from C. A. Clark, High River Times, who was elected president of the section at the recent Banff meeting.

Executive members attending are: Messrs. Clarke and Patrice; C. A. MacLean, Strathmore Standard; L. Macdonald, P. B. Kneave, Fort Saskatchewan Record, 2nd vice-president; Fred John, Leduc Representative; Bert Ford, Lacombe Globe; Garth Johnson, Peace River Record and Gazette; and Bob McCrea, Hanna Herald, executive members.

Hat Irrigation Plan Awaits Federal Move

Spy... By the Staff

Alberta department of agriculture today is awaiting a proposal from Ottawa for a meeting between federal and provincial irrigation department heads to discuss irrigation plans near Medicine Hat.

Members of the Friendship Train contingent to Lloydminster started yesterday morning, wondering whether the CNR can continue to operate economically.

Seems the line employs some high-priced waiters on such runs as the Friendship Train.

Visitors to the club car were served coffee by no less than Pat Rooney, district passenger agent, from England.

Sales representative for Cliff and C. Walsall, England, Warren Kirby, is a business visitor in the city. His company manufactures leather goods.

ON TO COWTOWN

Calgary, Lethbridge and Medicine Hat amateur radio ham station operators will hear addresses on emergency communications by S. J. Jones, of Edmonton. Mr. Jones is Alberta manager of the American Radio Relay League. He is also section emergency co-ordinator. He leaves for Calgary tomorrow.

At yet we have received no proposal from the federal government for a meeting between provincial and federal irrigation authorities," Mr. Ure said.

Raffle Prize Is Timepiece 'Lost' on Train

Allen D. McAtvish is breathing more easily today.

When the Friendship Train left "X" station Thursday morning, Mr. McAtvish somehow became parted from his valuable wrist watch.

Before a reunion was accomplished, the watch has become the object of two raffles, one netting \$12 for Lloydminster's new Memorial hall and the second a like amount for Willington Road of Trade.

O. C. McAtvish, Edmonton chamber vice-president, organized what he called a "thoroughly dishonest raffle" for train riders only. But after Lloydminster's successful supper, when the draw was made, no winner claimed the prize.

Mr. McAtvish presented the cash proceeds to R. G. Chapman, president of Lloyd Road of Trade, for the town's new Memorial hall.

When the train stopped at Willington Friday night, and a supper was served, Mr. McAtvish was stowed away. Mr. McAtvish said tickets were now more and tried again. This time he came up with a winner—none other than the lost watch.

This nature pleased the host, and then Mr. McAtvish released Willington by turning over raffle proceeds to the chamber, president, to be used by the chamber.

NEW MANAGER OF Edmonton branch of J. J. Gibbons Ltd. advertising agency is E. Mahner, succeeding J. H. Fulton, who will remain as advertising consultant. New office of company will be in Imperial Bank building. Appointment of R. G. Kroll, assistant executive, and Miss E. Hoffman, secretary, is also announced.

Military Parade

The 19th Alberta Armored Car Regiment will parade at 7:45 p.m. on Saturday night.

Aid for Europe's Tots Pledged by Club Here

Campaign to raise funds for children in former war areas of Europe and the East will be sponsored shortly by Edmonton branch of the United Nations Association.

At present in town organizing a drive in connection with the United Nations International Children's Emergency Fund is the national chairman, B. A. Macdonald. He met last night with UNA members at a dinner in the Corona hotel.

Set up in 1947 with funds left over from government allocations to UNRRA, the Children's Emergency Fund aims to supply food, clothing and medical supplies to needy children in war-torn countries. Last year, Canadians contributed generously toward the fund, he said.

Young Girls Asked To Leave

Two young Vancouver women were told rather politely to "hit the road" by Magistrate A. I. Miller when they appeared in police court here yesterday on charges of vagrancy.

The two women, Tracy Bacon and Peggy Mahoney, both formerly of Vancouver, were arrested Oct. 13 when police noticed them in the company of undesirable characters.

Polio Mounds

Another new polio case in Alberta was reported to provincial health authorities today to bring the total for the province to 101. For this season, latest victim is a 10-year-old boy, Kenneth J. Smith, of Seven deaths have resulted from this year's outbreak of the disease.

Investigation of Mr. Smith by Dr. J. H. Macdonald, archbishop of Edmonton, will take place next month at St. Joseph's hospital.

The Edmonton has been active in church, hospital and community work here and was chairman of the Roman Catholic campaign fund committee in 1947.

By BILLY ROSE

Blind Panic Ends MD's Mercy Errand

A little before 9, the phone rang. "Glen Falls calling Dr. Van Eyck," said the operator. "Speaking."

"There was the usual click and go-head-please, and then: 'This is Dr. Haydon at the Glen Falls hospital. A boy was brought in a little while ago with a bullet in his brain. He's hemorrhaging badly and the pulse is pretty weak.' 'I'm 60 miles from Glen Falls,' said Dr. Van Eyck. 'Have you tried Dr. Mercer at Whitehall?' 'He's out of town,' said Dr. Haydon. 'The reason I'm calling you is that the boy happens to come from your city. He was spending the week end with relatives here and shot himself playing with a .22.'"

There's No Fee For Surgeon

"You say the boy's from Albany?" said Dr. Van Eyck. "What's his name?" "Arthur Cunningham," said Dr. Van Eyck. "Well, there are a lot of Cunninghams around here. Don't think I know him. Anyhow, Doctor, I'll get there as fast as I can. It's snowing pretty badly, but I think I can make it before midnight."

"I think I ought to tell you the kid's parents are poor and there isn't much chance of a fee," said Dr. Van Eyck. "That's all right," said Dr. Van Eyck. "A few minutes later, the surgeon's car stopped for a red light on the outskirts of Albany. A man in a brown leather jacket opened the door and climbed in. 'Drive straight ahead, mister,' he said, 'and better not make a fuss—I've got a gun.'"

"It's a doctor," said Van Eyck. "And this is an emergency," said the car chief. "Step on it."

A mile out of town the man in the leather jacket ordered the doctor to stop. "Start walking back toward Albany," he said, "and don't turn or I'll shoot."

Delay Over Two Hours

As Dr. Van Eyck leaned forward to buck the wind, he heard the car pick up speed and when he finally turned, the tail-light was out of sight. It took a half hour to find the phone, and a lot of talking to persuade a taxi company to send out a cab. At the railroad depot he found the next train to Glen Falls wasn't until 12:10. "It was after 2 when the surgeon reached the hospital. Dr. Haydon was waiting for him. 'I did my best,' said Van Eyck. 'but my car—'

Menace to Britain If Reserves Drop

Bleak Picture Drawn Of Despair As Food and Materials Curtailed

By Stuart Underhill
LONDON, Oct. 15.—(CP)—British financial authorities watch their country's gold and dollar reserves with the anxiety of engineers eyeing a frantically pressure gauge.

If the reserves drop below a certain point, Britain will be bankrupt. Few men, if any, know the exact figure at which the disaster would occur, but it cannot be far below the \$385,000,000 held at the end of September.

The reserves are shared by all members of the sterling bloc. They pay into it their dollar earnings, and withdraw their dollar needs. If the pool was insufficient to meet the demands—bankruptcy.

"It would mean that the sterling area would break up; that British imports would fall sharply; that in the resulting industrial disturbance there would be heavy unemployment and little chance of curing it," the sober Manchester Guardian said in a recent editorial.

MUST EARN MORE

The Guardian said there was only one solution: to earn more dollars, in the meantime it recommended a drastic retrenchment in domestic expenditure in Britain.

No government spokesman has denied the situation as bleak as the Liberal Guardian, but a picture of what would happen to Britain if the dollar shortage intensified was drawn a year ago in the official journal of the Board of Trade, a government department.

The article outlined what would happen in 1947 if dollar grants had not been made through European Recovery Plan. "Institutions of better sugar, cheese and bacon would all have had to be cut by over a third, and there would have been less meat and eggs," it said.

"Cotton goods would have disappeared from the home market, supplies of footwear would have been reduced, and tobacco consumption would have been cut by three quarters."

HAD ONE RESPIRE

"It would have meant even less petrol for private motoring, and fewer films for cinema and books. Shortage of timber would have meant a further reduction in house-building, perhaps to 50,000 a year, and the electricity-generating program would have been held up for lack of non-ferrous metals."

"Most serious of all, our supplies of raw materials for industry would have been affected. The general dislocation of industrial activities might well have brought unemployment figures up to 1,500,000 and would have become progressively worse as the lower standard of living resulted in diminished productive effort."

"E.R.P. staved off that crisis, but it is scheduled to end in 1962 and its grants dwindle annually. In the intervening two years Britain has granted many purchases to non-dollar sources, but there are some dollar materials without which she cannot manage."

Sir Stafford Cripps, chancellor of the exchequer, said in a recent speech that the dollar pool had dropped to \$230,000,000 last Sept. 15, when the pound was devalued from \$4.03 to \$2.80 (this estimate was based on the old rate).

In the 12 days following, it improved by \$21,000,000. Britain's dollar hinges on that improvement continuing.

He didn't say, in a prepared statement, where he obtained his information, but said that was his "understanding."

"The Truman program," Taber said, "calls for enormous increases in spending. It calls for so many more expenditures that our deficit for the current fiscal year is bound to be \$5,500,000,000."

The effect of a devaluation program, he continued, would be to help create inflation, increase the poor man's taxes and reduce his purchasing power, and "make us suckers for the foreign gold producers."

150 DONORS AT DIDSBURY

CALGARY, Oct. 15.—Best response so far by Didsbury and district citizens to the Red Cross blood bank was last Thursday, when 150 donors responded. The clinic was held in the Evangelical Church basement.

Farmer Is Fined On Driving Charge

WETASKIWIN, Oct. 15.—Albert Klues, Brightview farmer, appearing in Wetaskiwin police court was fined \$25 and costs of \$40.10, for dangerous driving on a charge laid by RCMP Constable Weston. It was said that while driving on the wrong side of the road he was in collision with another car. The incident occurred September 27.

\$72 Billion Lawsuit Filed in Los Angeles

LOS ANGELES, Oct. 15.—(AP)—An estimate of \$72,000,000,000 suit claimed to be the largest damage suit in United States history—is on file in federal court here.

Arthur R. Van Wyke and A. E. Harrison, management consultants of Los Angeles, lodged the mammoth complaint yesterday, alleging that amount was their potential profit from a metallic lubricant which they were going to sell world wide.

Defendants in suit include Standard Oil Company of California, A. D. India and associates, several other employees and 100 John Deere. Earlier, Van Wyke and Harrison filed a \$12,000,000 suit against India.

Van Wyke and Harrison, who claim ownership of about 70 per cent of the India stock, allege that the defendants interfered with their efforts to sell the metallic lubricant and caused the cancellation of an agreement to participate in profits from world-wide sale of the product. They also claim that a sample of the lubricant was adulterated by defendants, injuring its reputation.

New South Wales, a state of the Commonwealth of Australia, is divided into 141 counties.

GOOD PROGRESS ON DIDSBURY WATER SYSTEM

DIDSBURY, Oct. 15.—It is expected that all water and sewer mains will be finished by freeze-up, as well as the main reservoir at The Butte. Very little rock and few obstructions have been encountered.

Turning on of water is anticipated by next spring, or early next summer.

Old-Timer Dies

DIDSBURY, Oct. 15.—Mrs. Charles Dickson, 85, old-timer of Didsbury district, died recently after a lengthy illness. Surviving are her husband, two sons, Lawrence and Harold, and two daughters, Mrs. J. Schellenberg and Mrs. John Snyder, all of Didsbury.

1906  1949

That You May Know

The March of Progress has brought this great Western country into its own; and it is fitting that we, in Edmonton should have the right perspective of the City in which we live.

When tabulating our great natural resources don't overlook our outstanding cultural and industrial achievements.

The picture below is an actual photograph of one of Canada's largest and finest Custom Tailoring shops. Right here in Edmonton where every LaFleche Bros. suit and overcoat is made by skilled craftsmen with years of experience. They are proud of the product they are making and of Edmonton their chosen city.

Where Every LaFleche Bros. Garment is Made — Right in the Heart of Edmonton on 102 St., Just South of Jasper

Our designing department makes an individual pattern for every LaFleche Bros. suit or coat. Before completion every garment is tried on to insure your complete satisfaction.

Don't be misled by the idea that Custom Tailored Clothes are expensive. They cost no more than most ready made; or so called made to measure orders sent East to a factory to be made from a block pattern from the cloth you select.

Custom Tailored
As Low As
\$57.50

We are now able to offer you a fine selection of imported English and Australian Worsteds and Tweeds from many of the finest Mills in Britain. Don't fail to see LaFleche Bros. before buying your next suit or overcoat.

SASK. COURT PROBES REGINA VOTE PLAINT

REGINA, Oct. 25.—(CP)—A recent, disallowed 460 ballots charge by J. O. Proke, defeated CCF candidate in Regina City constituency in the federal election June 27, that officers and agents were not properly sworn to secrecy at poll 78 was denied by Mrs. J. J. Slink, a scrutineer stationed at the poll.

Mrs. Slink said she and all other scrutineers were properly sworn to secrecy.

She testified at inquiry into the counting of ballots in the constituency. The inquiry is being conducted by Chief Justice J. T. Brown of the Saskatchewan Court of King's Bench.

Mr. Proke had protested that Judge B. D. Hogarth, who conducted

the inquiry, was improperly sworn to secrecy. The European council's ministerial committee will meet here Nov. 5, it was announced today. The ministerial committee, including the foreign ministers of the council's 12 member states, will face a weighty agenda topped by the question of western Germany's admission to the organization.

Council Meets Nov. 3

PARIS, Oct. 25.—(AP)—The European council's ministerial committee will meet here Nov. 5, it was announced today. The ministerial committee, including the foreign ministers of the council's 12 member states, will face a weighty agenda topped by the question of western Germany's admission to the organization.

LIKE POONA TIGERS Y'KNOW

LONDON, Oct. 25.—(AP)—The hunt was on yesterday for 20 nearly wild cats living in a "jungle" of weeds and bombed rubble near St. Paul's Cathedral. They're domestic cats gone native.

A woman passerby was badly scratched by one this week.

Top RAF Officer Tours Northland

MONTREAL, Oct. 25.—(CP)—Lord Dufferin, Marshal of the Royal Air Force, arrived in Montreal last night about a plane from Churchill, Man.

The wartime leader of the RAF is on the last lap of a tour of Canada. He returns to England, Sunday.

WORTH \$80,000

Princess' Big Diamond To Be Single Pendant

LONDON, Oct. 25.—(CP)—Princess Elizabeth is faced, with a problem most women would enjoy solving—in what setting to wear a 34-carat pink diamond.

The diamond was given her as a wedding gift by Dr. John Williamson, African mining prospector, formerly of Montreal.

At first Elizabeth thought it might be fitted into her personal crown, but experts considered it might lose its glory among so many other jewels. They have suggested it should be mounted as a single stone in a pendant.

Evenly cut and polished, the stone measures more than half an inch across. It has a nominal value of £28,000 (\$80,000).

Dr. Williamson, a shy bachelor, sent it secretly by emissary to the princess. Recently he returned an offer of £100,000 for his mine.

"What would I do with all that money?" he asked.

Steel Study

HAMILTON, Ont.—(UPI)—Blair Gornalake and Werner C. F. Ponsness, Norwegian engineers, spent three days here studying steel production for the Norwegian Government. They also visited steel mills in the United States.

Higher Prices At Feeder Sale

WILLIAMS LAKE, B.C., Oct. 25.—(CP)—Average prices topped last year's sales at the 13th annual Cariboo feeder and fat stock sale. It was reported yesterday.

Sales totaled \$489,000, bringing an average price of \$145.50 a head for the 2,500 animals sold.

The one-day sale Thursday was a record in point of numbers. Total last year was 2,500 animals and the year before 2,700.

Buyers paid higher prices for calves; good steers were well in line with present markets, and feeder cattle sold well.

Italy Buys Stock

OTTAWA.—(UPI)—The Trade Department said Italy has placed an order for ten Yorkshire pigs, two hours and eight sows, for use as breeding stock.

U.S. FLAG DISPLAYS IN CANADA RAPPED

VANCOUVER, Oct. 25.—(CP)—Is there too much waving of the Stars and Stripes in Canada? "Yes," says the Vancouver Tourist Association.

After listening to mutterings about the United States flag being displayed in hardware stores, hamburger stands and haberdasheries, association manager R. H. Baker said today the complaints are justified.

"We might as well just display a dollar sign," he said. "People here have the misguided notion that by showing an American flag, they're pleasing American tourists."

"They're not."

He said extensive American flag waving in Canada "ruins tourists the wrong way."

Verbal, Steel Missiles Get Truman Approval

WASHINGTON, Oct. 25.—(AP)—A supplemental \$78,000,129 appropriation bill including new funds for the Voice of America broadcasts was signed yesterday by President Truman.

The bill also contains \$5,000,000 to start work on an air force guided-missile project.

Diefenbaker Attacks Crown Permit to Sue

OTTAWA, Oct. 15.—(CP)—The Commons yesterday heard a renewed appeal for abolition of the necessity for asking permission in order to sue the crown. John Diefenbaker (PC-Lake Centre) raised the matter during committee consideration of a bill to amend the Exchequer Court Act.

The bill, which deals with procedural matters affecting the court, passed the committee stage—clause-by-clause discussion—and then was given third and final reading.

Previously, A. L. Smith (PC-Calgary West) had asked the government to dispense with the need for gaining government permission before suing the crown. He had contended it was old-fashioned and undemocratic.

Mr. Diefenbaker said the United Kingdom has already removed this section from its legislation. He referred to remarks made several weeks ago by Justice Minister Garson that permission is never refused to anyone seeking to sue the crown.

Mr. Diefenbaker said he challenged the minister's statement. He referred to a case around 1938 in which he said, Indians in Saskatchewan were refused such permission. The suit was against employees of the Department of Interior.

Mr. Diefenbaker said he would like the minister to give assurance that if Indians want to sue the crown, permission will not be withheld.

Mr. Garson said he would look into the specific matter mentioned by Mr. Diefenbaker. However, he would not commit himself on the general principle of Mr. Diefenbaker's request.

Mr. Diefenbaker replied that by such a statement Mr. Garson was

Rail Men Ask Higher Rates

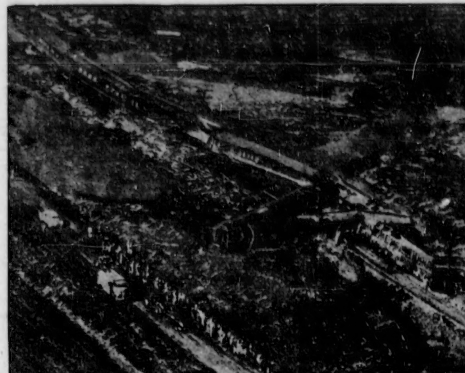

MONTREAL, Oct. 15.—(CP)—The railways and 13 International Brotherhoods seeking shorter hours and higher pay will meet here Tuesday at their first hearings with a pair of federal-appointed conciliators. It was announced yesterday.

The conciliators, M. M. MacLellan, and H. R. Pettigrew, industrial relations officers, were named this week to hear the dispute between the rail lines and the brotherhoods representing more than 100,000 non-operating employees.

The International Brotherhoods are seeking a general increase of seven cents an hour and a 40-hour week with the same take-home pay as the present 48-hour week.

Still Hoofing
KNAP HILL, Hampshire, Eng.—(CP)—The Knapp Hill Old-Time Dance Club gave its membership

to Mr. H. Stevens, 70, who is still an active member.

AERIAL VIEW shows grotesquely-twisted wreckage caused when Rock Island Line steamliner plunged into hole created by washed-out roadbed three miles east of Meade, Kas. Four persons were killed and 75 injured. Note standing water and crowd on road to left.

Seek History Help

REGINA, Oct. 15.—(CP)—A brief dealing with the promotion of research in western Canadian history will be presented to the royal commission on development in the arts, letters and science when it sits here Nov. 24. Lewis Thomas, Saskatchewan's archivist, said today. He will present the brief on behalf of the province's archives board.

Window-Smashers Grab Tray of Rings

CALGARY, Oct. 15.—(CP)—A pair of smash-and-grab thieves made off with an unknown number of rings from the show window of a Ninth Avenue East jewelry store last night. A rock was used to smash the pane of glass.

Probe River's Secrets

VANCOUVER, Oct. 15.—(CP)—Engineers at the University of British Columbia are determined to find out why the lower Fraser River floods each year. They are building a scale model of the river and will make minute calculations of water poured through the model.

Air Record Set Across Pacific

VANCOUVER, Oct. 15.—(CP)—The fastest commercial flying time between Hong Kong and Vancouver was claimed by Canadian Pacific Air Lines today as its big, four-engine flag ship, "Empress of Vancouver," set down here 16 hours and 12 minutes after leaving Hong Kong.

Some Given Pension Help

OTTAWA, Oct. 15.—(CP)—Veterans' Minister Gregg gave a statement to the Commons yesterday to clarify what he considered "misunderstanding about the county" about what the government is doing for British war pensioners in Canada because of the effects of the pound's devaluation.

Mr. Gregg said Canada does bring up to Canadian dates the pensions paid men who lived here before enlisting in British forces and who now draw British pensions. They comprised "a very special group."

Canada does not pay anything to British pensioners who have settled here but who did not live in Canada before enlisting in the British forces. Nor does Canada pay any supplement to the pension of British-born men who were pensioned from the British services and retired here.

No action is contemplated, the minister said, to change this situation.

Sask. Irrigation Plan To Cost \$100 Millions

OTTAWA, Oct. 15.—(CP)—Agriculture Minister Gardiner last night told the Commons the overall cost of the South Saskatchewan River Irrigation project will probably be more than \$100,000,000.

This inflated post-war estimate is considerably more than the original estimate of \$60,000,000—was given by the minister during consideration of Agriculture Department estimates.

CLARIFICATION ASKED

Mr. Gardiner discussed the government's irrigation policy while Ross Thatcher (PC-Moose Jaw) pressed for clarification of something the minister had said in the Commons the previous night.

Mr. Thatcher referred to Mr. Gardiner's remark that the Saskatchewan government could easily raise \$100,000 or \$150,000 a year during the 10 years necessary to build the South Saskatchewan project.

Mr. Thatcher also referred to Mr. Gardiner's statement that the federal government is footing the whole bill for construction of the main dam and irrigation project. The provinces would be expected to carry their share of the subsidiary projects involved in the irrigation program.

50 PER CENT SHARE

Mr. Gardiner's statement that the province's share, in the opinion of the federal government, should be about 50 per cent.

Mr. Thatcher said that from the minister's remarks, Saskatchewan would be expected to contribute between \$30,000,000 and \$40,000,000 for the 10 years. If that amount was 50 per cent of the total cost then what, Mr. Thatcher wanted

to know, did the minister figure to be the cost of the dam proper?

Mr. Gardiner declined to be pinned down to any specific figures.

DISAPPOINTMENT SEEN

John Diefenbaker (PC, Lake Centre) entered the debate to say the people of Saskatchewan would be disappointed in Mr. Gardiner's remarks.

Mr. Diefenbaker said the people had never recovered from Mr. Gardiner any indication of the division of cost such as he had given the Commons last night.

Mr. Gardiner said the approximately \$50 division of costs between the province and Dominion was reached by the commission appointed to consider the Lettbridge-southeastern irrigation project of Alberta in 1942.

Auto Kills Manitoban While Walking Home

WINNIPEG, Oct. 15.—(CP)—William T. Gingles, 37, of suburban West Kildonan was instantly killed last night when struck by an automobile near his home.

An employee of the Winnipeg Electric Co., Gingles was walking home from work when the accident happened.

Police said the operator of the car was Robert Reinach.

North America has more than 345,000 miles of gas pipelines.

ANNIVERSARY DAY MONDAY AT WOODWARD'S

STORE HOURS: 9:30 a.m. to 5:30 p.m.—TELEPHONE 5-13

Home Show Opens In City Monday

Touring Exposition Boasts Many Ideas For Everyone

Ideas galore for the home of tomorrow will be seen by home owners, home builders, and family heads at the Better Homes Exposition which opens at Edmonton's Stock Pavilion Monday.

Exposition will be open to the public for six days, day and night, from October 17 to 22.

Show is sponsored by the Edmonton Home Builders' Association in co-operation with the National Home Builders' Association, Inc., and brings to this city a wealth of instructive information and advanced ideas on plans and finance in future building.

About 75 exhibitors have combined to give a display of everything new and modern for the home, its exterior, its interior, its decoration and construction, its sanitation and heating, its lighting and laundry.

BIG CROWDS
More than 40,000 persons attended the exposition when it appeared in Calgary recently, and it is expected that Edmonton's attendance will top the 60,000 mark.

Many thousands more without it at Winnipeg and Toronto, where it started its Canadian run in May of this year.

The exposition has been in operation in the United States for the past 22 years and its sponsors plan that it will become an annual event here.

It fulfills a need that the National Home Builders' Association has long been advancing.

This association has also clamored for materials when they were scarce, for more equal distribution of the lumber and building materials when they were scarce, for more exact methods of financing home building.

BENEFIT LITTLE MAN
And it is for the benefit of the small home builder that these shows will become annual affairs, giving him an opportunity to keep ahead of the trade developments.

As an inducement for those lacking interest, the show has added \$2,000 worth of valuable prizes. Some will be given away daily and other prizes to be drawn at the end of the week.

Home planners will be intensely interested in the tremendous exhibit displayed by the General Housing and Mortgage Corporation.

This government project has added information on financing and know-how of building, and

new methods of low-cost house construction.

Home building covers many trades and crafts.

There is the designer, architect, and the contractor who handles the construction of the walls, roof and foundations, which may be brick, stone, concrete and lumber.

Most necessary is the plumber whose experience will assure health to the family with proper sanitation, hot water comforts for laundry, kitchen and bath, toilet accessories.

Even he has gone modern and a delight to the housewife. With faucets and fittings in gleaming chromium, the plastic fixtures in many colors, the kitchen gadgets from dish washers to electrical appliances.

The heating arrangements today are many.

NEW STYLES
At next week's exposition will be seen plans for new style homes which lack the turreted, projections, verandas and porches of the past.

Today the low-cost house with the wide eaves is coming into favor. Architects have modern life and its habits to consider when planning today.

Simplicity has taken the place of the ornate in exterior, comfort is more sought than fashionable living rooms.

Much of the decoration of old now rightly goes into gardens and grounds to make a house habitable, comfortable and desirable.

Steel Strike Will Hit Ford Output

WINNIPEG, Ont., Oct. 15.—(CP)—Production at Ford Motor Company of Canada, Ltd., will be affected by the end of October and may be seriously curtailed during November, union strikers in the United States steel industry are settled in the message.

A company statement today explained that at present it is using steel which it had stored against this emergency but the stock will be rapidly exhausted after the end of the month the strikes commence.

PRIZE EXHIBIT of Home Builders' Exposition which opens here Monday is this one of Aluminum Company of Canada. Exhibit which opened in Toronto many weeks ago, has drawn crowds there, in Winnipeg and

Calgary. It will be open to Edmontonians all next week, morning noon and night. It shows some of advantages of aluminum in home building and repairs. Its theme is "Design and build with Aluminum."

Annual Fire Losses Hit Millions Through Stupidity

One acquired, a new home is a most prized possession, but most amazing are the negligent and careless things many homeowners do to expose their homes to the hazards of fire.

Even in spite of 50 years' safety education, North Americans still think of new ways of doing the wrong thing every month or so.

For instance, a young man who thought a little extra care would prevent gasoline from causing trouble, used it to clean his basement floor and then carefully flushed it down the cellar drain.

An automatic pump in the drain switched on, sparking slightly.

The resulting explosion moved the house off its foundations and seriously burned the man and his wife.

A Kentuckian thought up a new way to get rid of mosquitoes. He switched a few handfuls of four long the air and ignited the dust with a burning newspaper.

He didn't know that dust suspended in midair can cause explosions more destructive than those created by several sticks of dynamite.

Now he has no mosquitoes and no house.

\$10,000 FIRE
A youngster who forgot that one way to start a fire is to concentrate the rays of the sun on wood with a magnifying glass, left his glass on a window sill.

A \$10,000 fire which resulted will no doubt keep him from forgetting again.

Experience may be the best teacher, but apparently some people never learn.

In Philadelphia a man fell asleep while smoking and set fire to his bed. He was rescued in the nick of time by firemen.

Forty minutes later the firemen responded to a second alarm at the same address and found the same man asleep in another blazing bed.

As foolish as any of these acts, and considerably more common, is the habit of tossing away still burning cigarettes and matches.

According to the National Board of Firewriters, this single act accounts for one-third of the fires that occur year after year.

Another bad habit, which is all too common, is pouring gasoline or kerosene into a hot stove to speed up a fire, or using them to start a fire.

All too common have been fires from these sources which wiped out prairie homes and families.

People do not exhaust their ingenuity in figuring out new types of carelessness that lead to fires. They also manage to do some strange things when fires get started.

THINKER!
In New York, a man woke up and smelled smoke. Thinking only of saving what he could, he gathered up an expensive set of hand-painted dishes in one hand and a new inter-spring mattress in the other.

Realizing he couldn't carry both, he carefully dropped the set of dishes out the second story window and carried the mattress down stairs.

A man in Illinois was awakened in the middle of the night, jumped out of bed and ran to the nearest firehouse 16 blocks away. En route he passed seven fire alarm boxes without noticing them.

Needless to say his house burned to the ground.

Ignoring the old-remembered advice of "get out and stay out" of burning homes, a 64-year-old man was killed when he re-entered his blazing home to rescue a small board of cash he was saving for his funeral expenses.

SMART KIDNIE
Occasionally, however, someone acts sensibly.

A five-year-old Salt Lake City girl noticed a fire in her home and refused to become terrified.

She first moved her toys to an adjoining room, closing the connecting door, so the fire couldn't hurt the toys," she told the firemen.

Then she took her nine-month-old sister in her arms, grabbed her two-year-old brother by the hand, and walked calmly out of the house, closing the doors behind her to confine the fire.

Once outside she told a neighbor boy about the fire and reported it.

Fewer lives and fewer homes would be lost in fires if more followed the coolness of youngsters.

Russians Return 9 Lend-Lease Ships

YOKOSUKA, Japan, Oct. 15.—(AP)—Russian crews yesterday brought six Soviet frigates into this United States naval base.

The vessels were the first lend-lease ships to be returned by the Soviets.

The frigates, sent to Russia during the war, are patrol-type craft of 1,400 tons.

Television Looming As Building Factor

While television is still some years away so far as Western Canada is concerned, the time is fast approaching when it may be an important consideration in the planning of the modern living room.

Today's planners think it may be the case for his changes in the North American home and way of life.

They think it may reverse the influence of the automobile and tend to keep the family members around their own hearthside—or rather their own television receiver.

One of the first possibilities expected by the planners is that it may eliminate the time-honored fireplace.

An architect who bought a television set was surprised to find his fireplace no longer the centre of interest in the living room.

He tells of how his living room furniture arranged around the fireplace is moved every evening to face the television set.

NEW CENTRE
"When we get up in the morning," he says, "we see by the re-arrangement of the furniture that the video screen has become the new centre of interest in our living room. The fireplace is neglected."

"So," he adds, "why build an expensive fireplace to begin with."

ELIMINATE BULK

This alcove is acoustically designed to enhance total effect. Television, radio and record-playing equipment is built into the room to eliminate excessive and bulky pieces of furniture.

Access for servicing is provided through panels, often opening from an adjoining room or closet.

Although there are only 42 TV stations presently on the air in 22 cities in the U.S., it is expected that television will become a part of the lives of 20,000,000 to 30,000,000 families in North America in the next five years.

Better Homes for Better Living

Builder 25 Years Sponsors Display

Better Homes Are Featured In
Exposition Here Next Week

One of Edmonton's leading house builders, George Prudham, is president of the National House Builders' Association which is sponsoring the Better Homes Exposition coming here next week.

Mr. Prudham is also member of parliament for Edmonton West and operator of a large building supply house on 104 street in South Edmonton.

The association which Mr. Prudham heads includes 1,000 Canadian house builders and has been responsible for building 80 percent of all homes erected in Canada since 1945.

He was born on an Ontario farm near Kilbride in 1904 and after attending school at Waterdown, Ont., became a carpenter. He has been a member of that trade and a builder for the past 25 years.

CAME WEST IN 1928

In 1928 he came to Western Canada to stay and began building at Lousy Lake, Sask. Shortly after this he moved to Edmonton, where he since has made his home.

He was sales manager of Armistage, McInnis Lumber Co. from 1928 to 1943 and supplied many homes.

national defense projects in northern Alberta during the war years.

In 1941 he formed Prudham Construction Company and in 1944 Prudham Building Supplies. He is president and general manager of both firms.

Mr. Prudham has been active in providing homes for veterans. He has constructed 120 homes in Veterans' Land Act projects and as a member of Edmonton Rehabilitation Council he led Edmonton house builders in a drive to complete 700 new homes before the winter of 1946.

He is a member of the Masonic Order, the Edmonton Rotary Club, Edmonton Chamber of Commerce and Edmonton Home Builders Club. He was elected member of parliament this past summer.

In 1948 Alberta produced 10,972,583 barrels of oil, approximately 4,000,000 barrels more than the previous year.

INSULATION tips are featured in striking display of Insulation Industries Alberta Ltd., at exposition. Novel methods of insulating, variety of tools and packings are just some of many interesting parts of display which will be at exposition.

EXECUTIVE of Edmonton homebuilders association pose on step of model home at Exposition. From left in front are Ross Grady, T. R. Diconson, Gordon Clark, John Pokette, D. R. Innes, R. W. Shorwin; in rear, from left, are Floyd Johnson, Steve Hruddy and W. B. Whyte.

Home Beautification Pays Joy and Money

Well planted home grounds pay great and continuous dividends to a home owner as does no other investment of a like amount.

For the home-owner who beautifies his grounds there is the joy of creating beauty. Also there is satisfaction in the knowledge that the appearance of the home will bear inspection of friends, neighbors and passers-by.

Well-planned grounds give unmistakable evidence of good taste, culture and refinement.

The joy of living amid beautiful surroundings pays off in more than these intangible ways. Every tree, hedge, plant and vine planted adds far more to the value of property than its original cost.

In effect, the home owner is actually paid for making the grounds attractive, not only by the added pleasure and satisfaction of living in cheerful surroundings, but in actual dollars and cents. By making your property more attractive, it is made more valuable.

Any real estate dealer will agree that a well planted place will bring far more money, if offered for sale or for rent than the same place unplanted or poorly planted.

The modern way of planting is to plant the whole grounds, not just near the foundation. Where space permits, the lot is divided by planting into such portions as the front yard or public area, side yard or semi-private area, the rear yard or private area and the service area.

Cooled Off

CUMBERLAND, Ont. — (CP) — In the old days they would have called it mutiny. One of four passengers attacked the operator of the ferry that crosses from here to the Quebec shore. The ferry zigzagged across the river and the attacker fell into eight inches of water. The four were arrested for causing disturbance.

TOWNY, Merioneth, Wales. — (CP) — A chicken laid an egg here inscribed with a perfectly formed letter "J". The letter was 3/4 inch long and enclosed in an indented circle.

Game Room Is Desirable

With indoor games, particularly card games requiring considerable concentration, becoming more popular during the approaching winter season a sound-proofed game room is much to be desired.

For this reason many families have constructed a special room where players will be out of the way of household activity and free from interruptions and distractions. Such a room may be attractively completed with a few large sheets of insulating board. This attractive board helps to reduce sound transmission.

For a decorative touch, "pipe" can be cut from leftover pieces of the board, painted and attached to the wall with an adhesive. They give an appropriate decorative touch.

HUNDREDS have CHOSEN THE MORTEMP FURNACE

as installed
in the modern
home at the
Better Homes
Exposition

Small... compact...
easily installed... economical in space
operation... no unsightly space-stealing
overhead pipes... efficient and practical.

- A forced air furnace ideally suited to a full basement or a no-basement house or building.
- Lower cost of MORTEMP CHIMNEY FURNACE.
- Lower installation costs.
- Less floor space taken up by furnace (only 25 1/2" square).
- Greater efficiency resulting in greatly reduced operating costs.

Alpha fans providing
silent, sure circulation
of air. Completely
automatic, using
Minnesota
Honeywell controls.

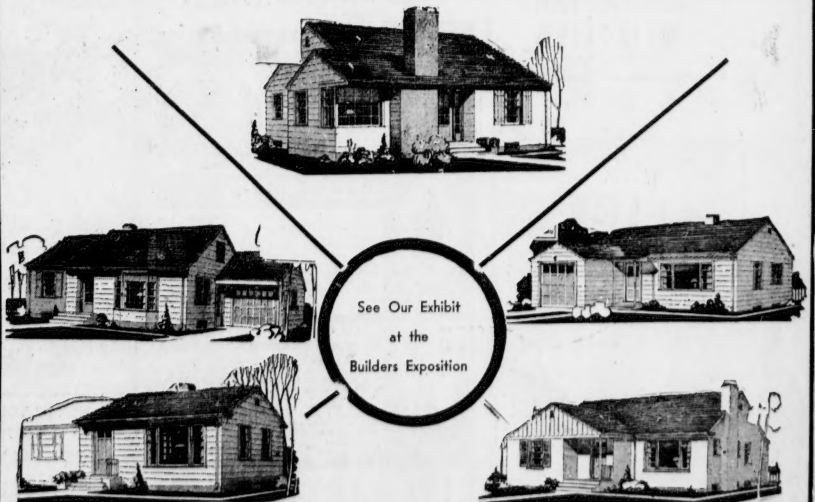

More than 100 MORTEMP CHIMNEY FURNACES are at present installed in Edmonton. If you would like to inspect one of these installations we will be glad to have you phone, write or call in at any time.

We are exclusive Northern Alberta wholesale distributors for the MORTEMP CHIMNEY FURNACE and we will be glad to co-operate with your architect, builder or heating contractor. For further information see your dealer or

In the past, with undoubtedly prove highly resistant to downward pressure. In fact it may be doubted that wages have reached their peak.

The cost of housing is tied to the general economy of the country and, while there has been a tendency for prices to level off during the last few months, there is no indication of a downward trend.

A fishery scientist has estimated that a female haddock, about 28 inches in length, can contain nearly 2,000,000 eggs.

MODEL HOME erected at Exposition is this trim little bungalow. Details on home, cost of construction, financing and other factors, will be given daily as Exposition

plays host to Edmontonians. Home was erected just prior to opening of show, and will be open for inspection each day, from early morning until late at night.

Canada Is Leader At House Building

Canada's house builders have steadily increased their production since the war until now they are turning out 90,000 units a year, more than 50 per cent greater than the peak pre-war year.

All this has been accomplished in spite of the gravest difficulties in obtaining materials, serviced land and trained labor.

This country's housing production for the four years 1940 to 1946 stands at 21 units per thousand population as compared to 19 per thousand population for United States, 17 units for Britain and 16 units for Australia.

Of the 81,000 new housing units built in Canada during 1946, 74,000

Special Planning Needed To Get Best Bathroom

Smallest room in the average house and most costly to furnish is the bathroom. For this reason, if for no other, it is deserving of special attention in the planning stage.

It is the one room in the house that in no way seems bound by tradition. In fact, the more modern, the better, seems to be the spirit in designing bathrooms.

Clay tile is still a leader for the floors and walls of a bathroom by virtue of its waterproof permanence, ease of cleaning and freedom from refitting.

Waterproof wallpapers have enabled many housebuilders to make their bathrooms as warm and attractive as most any room in the house.

The only general rules needed in planning a bathroom are to provide for convenience, privacy and sanitation.

Bathroom electric outlets and switches should have insulated, non-conductor cover plates. The safest practice is to have switches located away from water faucets where they can not be readily reached with wet hands. Pull

chairs are dangerous for bathroom lights.

MINIMUM SIZES

Because of the size of fixtures the minimum size for a complete bathroom is usually figured to be five and one-half by seven feet. Any addition to this size will make for more comfort and additional storage space for towels, soiled clothing and bathroom supplies.

Since the average family bathroom is frequently used by more than one person at a time, larger areas are preferred, often with the bathroom next to or above the kitchen or other washroom.

Economy in plumbing can be gained by planning to have the bathroom next to or above the kitchen or other washroom.

HELPS PRIVACY

For privacy bathroom doors should not be directly at the head

Old Way Best

HALIFAX. — (CP) — Modern science took a beating recently when it was found that a mechanical wind-gauge wouldn't work stop the Halifax post office because of some quirk in the building's construction. So they hoisted an old piece of cloth on the flagpole. When it flaps wildly, weather forecasters know the wind is blowing strongly.

Unpalatable Plane

FOR AIRDAL, Norway. — (CP) — When a farmer discovered recently that his cow had eaten an airplane and died, he brought suit against the government. The animal had tried to digest pieces of lead and rubber from a plane that had crashed on his farm. The farmer contends that the state was responsible for removing the wreck.

of a stairway or visible from living or dining rooms. The door should swing so as to shield the water closet when the door is open. This facility should be as near bedroom as possible. If one bathroom is to serve more than one bedroom it should be entered from a hall rather than directly from the bedrooms.

Few Simple Repairs Can Insure Dryness

If your cellar is wet, or even damp, after a heavy rain or a long thaw, a few simple and inexpensive repairs may remedy the condition.

First, check the grading to be sure that surface water drains away from the house, and make sure the drains are not clogged up. Next, check the cellar walls and floor for cracks. If you find any, they should be widened out and deepened, with a hammer and pick and then filled with cement.

Another common cause of dampness is likely to need attention is where the walls join the floor. Water often seeps into the cellar along the path shown by the dotted line in the diagram. The remedy is a waterproof cover all around the inside of the cellar. If necessary, this cover can be extended up the walls for a foot or two.

REMOVE DUST

With a stiff wire brush remove all loose particles from the surface before repainting and get rid of any traces of oil or grease with kerosene or gasoline. A water proofing compound should be added to the concrete mixture to stop water seepage and aid in bonding the new concrete to the old. There are many good waterproofing compounds on the market. Whatever compound you choose should be added to the concrete mixture in accordance with the manufacturer's directions.

For the mortar itself, a mixture of three parts of cement and one part of cement is satisfactory. Mix these well and add just enough water and waterproofing

THIN LITTLE homes as these in vicinity of Kingsway, near municipal airport, can be made even more attractive by following advice and timely tips given by many exhibitors at city's Better Homes Exposition which runs at Stock Pavilion here all next week.

HOMES-TO-BE will get full advantage of Exposition tips and advice. These spring-up on Kingsway, near 106 street, could do much worse than follow ideas and money saving devices on display here all next week.

Improved Heating Plants Prove Housewife's Boon

Improved heating equipment and fuels are rapidly removing the heating plant as the number one source of fall house cleaning work and bringing closer to realization than ever before the long sought ideal of "clean" heat for the home.

This is due, heating engineers say, to improved steam and hot water heating systems, variable walls and dust-covered furnishings in rooms.

Instead of blasts of hot air sent directly from the furnace into rooms, the improved systems distribute heat by means of steam or hot water to compact, enclosed room-heating units which, in modern practice, are generally installed beneath windows.

High unit circulates air only from its own room, therefore, clean rooms result in clean heat. Convector-radiators are an example of the forward strides which have been made in more efficient units. The heating unit in convectors is a compact, finned-type assembly of either aluminum or copper completely concealed within a streamlined cabinet.

By natural convection without the assistance of fans or other mechanical aids, air is drawn into the cabinet at the floor line, heated as it passes through the heating element and is discharged from the room through a decorative grille at the top of the cabinet.

The outlet grille is located at the front of the cabinet near the top so that the heated air travels outward into the room instead of immediately upward against walls where most of the soil and grime, caused by older equipment usually is found.

Increased use of the newer systems has also resulted in cleaner basements and has freed the basement for the construction of at-

tractive recreation rooms, home workshops, photo hobby rooms and other uses. The central system and the small pipes required for the distribution of steam or hot water occupy much less space than the bulky ducts needed for the distribution of heated air.

Plan Tin-Plate Mill
PORT KIDMILL, Australia—(CP)—A tinplate mill covering several acres is being built here. It will turn out 120,000 tons of tinplate a year, most of which will be used for Australian canned fruit and other goods.

Your VAN-PACKER Chimney Is Ready . . .

QUICK, EASY TO INSTALL—FOR IMMEDIATE OPERATION

This is no dream. The Van Packer is now available—the unique new prefabricated, sectional chimney that offers you much greater efficiency, immediate service, and—saves up to half your normal installation cost.

Delivered, packaged in easily-handled sections, it can be installed in any one or two-story house in an afternoon, even by unskilled labor. Once assembled, it fuses into a streamlined unit as permanent as your home.

Various modifications are available to conform to various types of buildings. All offer the same striking performance, "file-lined, metal-lined, smokeproof, they offer insulating for superior to masonry chimneys, plus unequalled draft control.

Tested for extreme firing by Underwriters Laboratories. Can be used with any type of fuel. Accepted under Federal Housing Act (U.S.) and National Housing Act (Canada). Manufactured in Canada.

This is the initial offering of Van Packers in Canada. For exact type suitable to your house, and for price, consult your local heating engineer, contractor or dealer today.

"THE HELENA" is a distinct departure in layout. If constructed with attached porch and garage it requires about 75-foot lot frontage. It was conceived and gauged from furniture indicated and by using graphic scale shown below plan, give quite commodious lines are developed to permit two large bedrooms and bath on second floor. Wide archway between living and dining room gives total of 25 feet in breadth for these rooms. Exterior indicated using part stone and brick with shingle garage. This is another in Builder's series of homes designed by Harold C. Beckett, M.R.A.I.C., 52 Chatham street, Windsor, Ontario.

Blood Loses Boy A Chance For Parents

ANN ARBOR, Mich., Oct. 15.—(AP)—Laboratory blood tests showed conclusively yesterday that an abandoned six-year-old boy is not the biological son of a Michigan Ohio couple.

For The Day-Ten Pageant on

six-year-old William Thomas (O'Neill) had been in question. Mr. and Mrs. Arthur Thompson had come to Michigan hoping Tommy would prove to be their son Ronald, kidnapped five years ago from their Dayton, Ohio, home.

Canada's labor force now totals more than 10 million, double of 1947, and is expected to reach 12 million by 1967, according to a report by the Canadian government.

Noel Baker Plans Visit St. Laurent

SOUTHAMPTON, Oct. 15.—(CP)—Philip Noel Baker yesterday sailed aboard the liner Queen Elizabeth on a North American tour.

Mr. Baker was announced last week as a candidate for the leadership of the Labour Party in the coming general election. He is a member of the House of Commons and a member of the Labour Party.

to his official duties he wants to see Prime Minister St. Laurent in Canada.

Heads Exhibitors

OTTAWA, Oct. 15.—(CP)—J. A. Mason of Springfield, N.S., yesterday was elected chairman of the National Committee of motion picture exhibitors associations of Canada. He is a member of the National Committee of motion picture exhibitors associations of Canada.

PEEPING TOM GRIZZLY PICKS WRONG HOUSE

STEWART, B.C., Oct. 15.—A "peeping tom" grizzly bear jumped out the hard way at Stewart, B.C. It didn't pay to peer through the bedroom window of Mrs. Felix Hunter.

She took the family rifle and fired point blank at the grizzly as it peered its head through an opening in the "peeping tom."

Intact Paint Film Vital

More often than not the complaint is too infrequent painting of a house that causes its deterioration.

Too frequent painting is also to be avoided, according to the Construction Research Bureau, New York, clearing house for building information.

Says the Bureau, if painted often than every three years, a thick paint film may build up and this will crack and peel.

AVOID DELAY

It is necessary, however, to keep the paint film intact and it is time to repaint when cracks extend almost through the film or if the paint is so eroded that the underlying surface is visible in spots.

Where paint has peeled or blistered repainting should not be delayed.

Home Units On Increase

Nearly 8,000 more dwelling units have been completed during the first five months of 1949 than during the same period of 1948.

Latest Bureau of Statistics reports show the figure as 7,860.

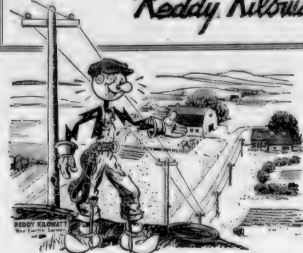

During the period, total number of units completed was 22,431. At the end of May, there were 23,533 under construction as against 26,456 at the beginning of the year.

In Western Canada, there were 12,528 dwelling units under construction at the end of May. In Ontario the total was 20,982; in Quebec 12,587; and in the Maritimes 5,944.

The western total is broken down by Manitoba 2,960, Saskatchewan 1,997, Alberta 4,467; and British Columbia 7,064.

Better Homes Out on the Farm as well

Reddy Kilowatt

In Alberta Better Homes and Better Living are being extended miles beyond city streets. Over 6,000 Alberta farms, at a cost of over \$6,000,000 are now enjoying the conveniences and comforts of modern electrical living. By next March the total should exceed 8,500. Plans call for thousands more every year.

Business-managed Utilities in Alberta are right on the job — and doing it fast.

Calking Tips For Houses

Most home-owners have never heard of calking except possibly in connection with boats.

Calking a house makes it weatherproof, just as it makes a ship waterproof.

When a house shrinks or warps cracks open up around frames. This not only allows cold air to enter the house, but water may find its way inside, too, and cause considerable damage to wallpaper, plaster and woodwork.

Such cracks should be sealed with calking compound. Fall is the best time for the job, because the shrinkage is the greatest.

Wherever window frames and doorways are set in the outside walls, or there is any break in the surface, the joints or cracks between the frames and wall should be filled with a calking compound.

No amount of putty will replace calking compound because putty and putty dry, and when they dry they become brittle.

Calking is very important for this application.

Calking compound can be applied with a calking gun, which may be purchased or rented at your local hardware or paint store, or with a putty knife. The gun is preferable because it is equipped with various-sized nozzles so you can force the compound into the various sized cracks.

INSIDE THAT "DREAM HOME"...

... when you get inside that house, how will the furniture look? Expensively new... or disappointingly scratched, marred. You can kill the "old look" economically by calling on DU-ALL FURNITURE FINISHERS. Du-All makes old, battered furniture look factory new. French polishing, re-finishing and furniture repairs all receive expert, trained attention at Du-All.

THE "HOOVER"—This plan is suitable for a lot as narrow as 40 feet and preferably it should be a corner. Note convenience of access from the garage to the hall. All rooms are well proportioned and a good size. Furniture arrangement as indicated on the plans can be made most attractive. The kitchen is most efficient and well lighted. This is another in a series of practical homes prepared by Harold C. Bowen, M.B.A.C., Windsor, Ontario, for readers of the Bulletin.

Tax Refunds For Christmas

OTTAWA, Oct. 15.—(CP)—About 500,000 Canadians will be getting an extra cheque for Christmas.

They are those entitled to tax refunds under Finance Minister Auluck's sweeping budget introduced in the Commons last spring. The budget is being reintroduced next Thursday but is expected to carry no major changes, and no changes at all in the tax-cutting provisions.

Meanwhile the revenue department has saved preparing the refund cheques about 200,000 of the former cheques are ready for mailing. It was saved. They would go out until the budget is given royal assent, expected some time before the end of November.

So far the cheques appear to average about \$150 each, although many of them are higher than that and others lower. On that basis it would appear that the refunds will amount to about \$3,750,000.

Proper Furnace Care Can Cut Fuel Bill

The average owner of a heating system that is five or more years old now is surprised to learn that the wide air serves to 10 that his winter heating bill is costing him at least 10 per cent more than necessary.

This is due in the fact that seven out of 10 older type heating systems are in need of cleaning and repairs. So reports the Canadian Chamber, National Warm Air Heating and Air Conditioning Association.

All leaks in and around the furnace combustion chamber, soot in the furnace or chimney, warped furnace and supply doors, turned grate bars, corroded smoke pipe, all create heat robbing conditions within the furnace itself. As a result, more fuel is necessary in order to keep the system at proper heating temperature.

OWNERS PAY SHOT

Heating dealers across the country report that through the use of improper firing methods and negligence of furnace maintenance home owners are paying the price. One dealer reports that out of

300 recent service calls 10 fireplaces had to be replaced, 15 furnaces required new grates, 20 furnaces had to be reset, and as a result of repairs, 30 furnaces had been returned to good operating conditions in homes where customers had been blaming their fuel as the cause of poor heating results.

Another dealer discovered that out of 200 cleaning calls 10 furnaces had to be replaced due to owner negligence, 15 had to be re-equipped with grates, 18 had to be reset and 40 required new smokepipes.

The majority of these major repairs could have been avoided if owners had followed a regular program of having their heating systems inspected every year. Regular cleaning of furnaces is also vital. Minor repairs can be effected at the time, adding longer service life to the system and insuring the health and safety of the family.

Reindeer Saved

STURTEVANT, Inverness, Scotland.—(CP)—The National Conservation organization vetoed a plan to take and kill reindeer for meat.

Two-Month Strike Ends In Sask.

MOORE JAW, Sask., Oct. 15.—(CP)—The two-month-old strike of employees of the Natural Soda Products plant at Bishopric, south of Moose Jaw, ended today. The

company and union officials agreed to arbitrate a requested 10-cent hourly pay boost and 10 per cent compensation agreement, on condition that all company employees return to work.

Prisoners were fifty commoners of the middle of the 15th century.

STRIKING shot of Edmonton from air (taken by Air-view Photos) shows ever expanding industrial and part of residential areas. Edmonton Home Builders Assn.

next week will play host to public at first annual home builders exposition at Stock Pavilion. Doors will open early each day, and remain open until late evening

Paint Brushes Need Care To Do Jobs

To do a professional paint job you must use a professional tool—a good brush.

If well cared for a good brush will last for years and will do a smoother job easier than a cheap brush.

When a new brush is purchased it should be broken in before you use it. Stand the new brush in raw linseed oil for at least 12 hours.

When ready for use, remove all the oil from the brush. This can be done by pressing the flat side of the brush against the wire fastened across the top of the pump pot.

Then, with the handle between the palms of both hands, bend the brush to throw off the remaining oil.

SMOOTH BRISTLES
Straighten the bristles and smooth them back to their original shape. Ready for use, the brush now has a protective oil coating which allows the paint to flow through it more easily, and it can be cleaned more readily.

After the job has been completed and the brush is to be put away, clean it thoroughly in the proper cleaning fluid. Brushes used in oil paints, enamels or varnishes should be cleaned in turpentine, while those used in alkyds must be cleaned with alcohol.

Brushes used in water paints, casein or white wash should be washed thoroughly in warm running water and then dipped in a solution of vinegar and cold water.

REMOVE FLUID
Remove all the cleaning fluid by the spinning method and wrap the brush in heavy paper after squeezing bristles.

Stand the wrapped brush in the brush "drip" containing sufficient linseed oil to overflow into the wrapper. Allow it to remain for at least 72 hours.

Then remove and place additional paper over the oiled wrapper. Store the brush in some cool place, turning the brush on its flat side.

When the job is interrupted for a few hours, such as overnight, merely wipe the brush well, rinse it thoroughly in the proper cleaning agent, wrap it in newspaper and lay flat.

RCAF Plane Crash Lands

An RCAF-RAP Winter Experimental Establishment pilot this morning escaped injury when he was forced to belly-land his Blue-tail fighter plane at the Edmonton airport.

The pilot is Pte. L. J. H. G. "Butch" MacArthur, who was doing routine training flights in the powerful aircraft.

He was circling for a landing when he discovered the undercarriage lowering mechanism had failed.

MacArthur cleared several times in an effort to locate the trouble but unable to locate the defect was forced to alight the plane in on his belly.

RCAF officials said an investigating officer would be appointed to trace reasons for failure of the undercarriage to function.

MacArthur was pilot of the "City of Edmonton" Spitfire entered in the Cleveland Air Races last August.

Russ Claim U.S. Flew Atom Area

PARIS, Oct. 15.—(AP)—Banned Sole Paris Tabloid weekly newspaper, said yesterday "American airplanes have flown over Soviet atom installations."

Quoting a Major Sidor, identified as chief of staff of a Russian artillery division during the war, Sidor said that the planes were probably carrying atomic bombs.

Sidor was quoted last July in the same paper as saying the Russians had exploded an atomic bomb.

SQUIRREL PASSES OUT AMIDST FIREWORKS

ST. THOMAS, Ont., Oct. 15.—(CP)—The hydro said it was a squirrel which did the damage. The squirrel climbed a hydro pole and started to swing on the wires.

First there were explosions, then there were fireworks. Then lights in the eastern section of the city were out and all the machinery in the district stopped, forcing some 600 workmen to sit around without anything to do.

Local linemen got things humming again. The wheels of industry and the 600 men started up again. But the squirrel didn't. He was dead.

ENQUIRE ABOUT...

Webster BASEBOARD HEATING
CANADA'S FINEST HEATING SYSTEM.

ONLY WEBSTER GIVES YOU THESE
OUTSTANDING FEATURES!

- Eliminates Radiators
- Allows more living space
- Promotes better planning of furnishings
- Closes even heat from floor to ceiling without drafts
- Is easy to install
- Reduces Fuel Costs to a minimum
- Is no more costly than other types of heating
- Enhances beauty of home
- Copper tubing throughout
- Is invisible
- Proves performance and the choice of Architects

WEBSTER BASEBOARD HEATING
SECTIONAL VIEW

With this new Webster Baseboard heating, air (as it is the floor level, rises over the thousands of copper fins of the heating element, is warmed and comes out at the top of the baseboard—rising to form a curtain of warm air along the entire wall of the room.

Sticking Doors Fixed In Few Simple Steps

Doors stick or bind, they get tight and swelling, loose and rattle, or they warp, but they have few troubles that can't be fixed in a few minutes.

Slight sticking can be remedied by rubbing the tight surface with the wood behind them with a wood paraffin or soap.

If sticking demands closing the door with considerable force, the portion at the top, bottom, or sides, which is causing the trouble will be evident upon inspection and may be eased by using a plane.

After a satisfactory fit is established, the top edge of the door corners, it can be tilted by setting should be painted or varnished to pieces of cardboard behind one of present further absorption of moisture.

Home Plumber Can Save Dollars on Own Repairs

When you do your own servicing and repairing of plumbing you save money in two ways—the cost of the work and also the cost of water that may leak through a faulty fixture.

Before beginning any plumbing repairs, make sure that the water in the line to be repaired is turned off.

In some plumbing installations each line in the house has a shut-off valve in it, in others there is one main shut-off valve back of the water meter.

To replace the washer in a compression faucet, the cap nut must be unscrewed from the faucet body and the handle, stem, and other parts removed as an assembly with the cap nut.

The screw holding the washer in place on the lower end of the stem can then be unscrewed and the washer replaced.

To remove the condition of the seat in the faucet body, if it is rough, it may be ground with a fine file and ground smooth as a replacement and maintain in most hardware stores.

To replace the rubber seal washer in the faucet body, remove the complete faucet must be removed.

Red Justice In Orient Exemplified

HONG KONG, Oct. 15 (UP)—This is one story now going the rounds in Hong Kong and other parts of the Orient.

A young man, who was arrested for a crime, was sentenced to death.

The sentence of the court was that he should be hanged by the neck.

The man, who was a Chinese, was sentenced to death for a crime.

ROMANTIC STORY of tremendous appeal is brought to screen of Empress theatre Monday in Paramount's "Song of Surrender." Starring are Wanda Hendrix, Claude Rains, and Macdonald Carey. Great musical background includes Enrico Caruso recordings and Metropolitan opera star Richard Tucker.

Inside Hollywood

By Bob Thomas
HOLLYWOOD.—(AP)—Audie Murphy's film career appears to be progressing, despite his marital troubles. He is going ahead with plans to film his war experiences.

The much-decorated hero told me that the outlook is bright for an early film of his story, "To Hell and Back."

At first, the former soldier balked at playing himself on the screen, but he apparently is oriented.

Formby Show Is Far Cry From Jockey

Outstanding British comedian George Formby earned his working life as a jockey.

He won his first track victory when he was 10 years old.

But then he began to put on weight faster than he could work it off, so he looked around for another career.

He chose vaudeville, having found that his talents as a singer and hand player went over big with his fellow jockeys.

And within 18 months he found himself a vaudeville headliner.

Since then, Formby has become a popular screen star (winner for 10 straight years of the Motion Picture Herald annual poll) as a comedian.

His first film role was in "The Million Pound Note" (1934).

Great Love Story In Empress Film

'Song of Surrender' Will Open Run Here Monday

A romantic love story and music of great appeal have been blended into Paramount's "Song of Surrender," a tenderly beautiful film which opens at the Empress theatre Monday.

Lovely Wanda Hendrix has her biggest starring role to date as Abby Hunt, a girl of 19 married to a man past 30.

Claude Rains co-stars as her husband, a man who judges his wife's devotion by the amount of work she does on the farm.

Abby never questions whether she is a happy marriage until the day young and handsome Bruce Ridgely comes upon the scene to remind her of the years she is wasting.

Macdonald Carey completes the star roster with his assignment as Abby's ardent suitor who offers her the love she has always wanted.

This dramatic triangle is set in New England shortly after the turn of the century. The story, told with the delicate grace of its picture-making, builds in intensity to a powerfully stirring conclusion.

A thrilling background of operatic semi-dramatic and popular melodies accompanies the dramatic developments of the plot.

Four Enrico Caruso records are used as an integral part of the story. The magnificent voice of the world-famed tenor is not only musical but is to be found in the picture, for sure on the bill.

Republican Named To U.S. Senate Seat

BOULDER, Idaho, Oct. 15.—(AP)—Henry C. Llewellyn, former Republican senator and representative, was appointed yesterday to the United States Senate seat vacated by the death of Sen. H. H. Miller (Rep., Idaho).

Deerhak was named by Rep. Llewellyn, Governor C. A. Bohlen. His selection reduces the Senate's Democratic majority to 54-44.

EDMONTON BULLETIN, Saturday, Oct. 15, 1919 17

Water power is an widespread in Canada that more than 90 per cent North America about 1918, when it is all electricity generated for sale, village in New York state tapped a distributed

By J. D.

Two of my secret operatives, assigned to civic affairs, came in with a couple of hot tips on the forthcoming mayoralty campaign last night.

CNR Officials Here Today On Hotel Plan

Details of the \$14 million MacDonald hotel extension plan are being considered here by CNR Architects H. G. Greenstead and S. H. Watson, it was learned today.

The two arrived in town from Montreal yesterday.

Mr. Greenstead is principal architect in the company's architectural department, while Mr. Watson is principal assistant and electrical and mechanical engineer.

Following up, details of the hotel conditions made in September to determine the type of foundation necessary, the two will take up preliminary details of the extension plan.

Construction will start as soon as the front is out of the ground next spring, according to former CNR President H. C. Vaughan's announcement of last month.

ONE LOT YET

Meanwhile, only one lot on the extension site remains to be acquired.

Residents in the central part of the property will vacate by March, and demolition will commence in April.

Final agreement between the city and the CNR has been approved but not yet signed.

While here, Architects Greenstead and Watson will also inspect work being done on the plan for the potential forward building at the CNR depot, and in the east wing company is spending \$1.5 million on the depot revision, and more than \$1 million on freight shed construction.

Stock Show Slated Nov. 1

Edmonton's Fall Livestock Show and Sale promises to be one of the largest in history, with 1,100 head of cattle on display.

The show opens Nov. 1, and judging and sales will continue through Nov. 4. Shows at the Edmonton Exhibition Association.

The show will be held at the Edmonton Gardens.

Big display of swine is expected with 500 head of Yorkshire, Duroc, Hampshire and 146 commercial animals entered.

Further swine will be judged Nov. 3 and sold Nov. 4, and commercial animals will be judged and sold Nov. 5.

Cattle, including 16 shorthorn females and a small entry of Aberdeen Angus will be judged and sold Nov. 5.

CCF Group Plans Meet Here Tuesday

Resolutions for consideration at the CCF's annual provincial convention here Dec. 2 and 3 will be prepared at a meeting of the Edmonton CCF Tuesday at 8:15 p.m.

A. J. H. Powell, principal of McCulloch school, who spent last year in England as an exchange teacher, will address the meeting on "Britain As I Saw It."

President of the city CCF branch Art Thompson will be chairman.

UNIQUE CANDIDATE

There's one thing about a candidate like Frederick Speed, this campaign agent says.

In one campaign his platform was built around demands for more public lavatories and bird sanctuaries.

Last time he entered the civic mayoralty race he was elected mayor by declaring he would be the MacDonald hotel for a city hall if elected.

A profound student of Shakespeare and the 19th century, candidate Speed has been lavish in the use of Biblical quotations and gems from celebrated works of the famed bard of Avon.

In his campaign he has already said he would build a new city hall if elected.

He has also said he would build a new city hall if elected.

He has also said he would build a new city hall if elected.

He has also said he would build a new city hall if elected.

He has also said he would build a new city hall if elected.

RAFTERS RING with chant of "all hands left" each Thursday night at Highland Community Hall as second season of square dancing classes draws average of 60 couples nightly. Invading grandpops' musical tribute to the fiddler's "Irish Washerwoman" tune are Mrs. John Adams, Jean Kostachuk, John Kostachuk, and John Adams.

Red Feather Drive Nearing Mark, Campaign Extended

With contributions to date totalling \$62,500, Community Chest campaign officials have extended the length of their drive by another week.

However, as has occurred other years, contributions will likely continue to come in for some time, say campaign heads.

Money collected a week from today, will constitute the whole of the 1949 total.

Although about \$62,500 still remains to be donated to achieve the \$100,000 objective, officials are hopeful that the full amount will be raised.

Furthermore, \$15,000 is the minimum with which the Chest can carry on. Directors are determined to reach that goal.

Largest donation of the past two days was \$1,000 which came from Imperial Oil Ltd.

Other sizable contributions were: Sicks Brewery, \$750; Calgary Brewery, \$500; employees of Northwest Industries, \$300; and employees of Woodland Dairy, \$500.

The warning came during the sentencing of Herbert Weimer, city taxman, who pleaded guilty Wednesday to a charge of living off the avails of prostitution.

He was sentenced to one year in Port Saskatchewan Jail.

"I want to warn all tax drivers and anyone here... who may have the opportunity of passing on the word, that not all of them will be treated as lightly in the event of their coming before this court (on similar charges)," His Lordship stated.

He told the accused he was being "as merciful as the circumstances permit" because it was his first offence and because of his good army record.

HARLETON, Norfolk, England (CP)—Villagers subscribed £50 (\$100) for a new ornamental signpost to give "a little more dignity to the market place." They didn't like the plain post purchased by the county council.

Major Industries Increase Output

Petroleum Shows Biggest Jump With 97 Per Cent

Night of Alberta's major industries showed substantial increases in production as compared to last year during the first seven months of 1949.

This is indicated in the statistical report issued today by the department of industrial and labor.

While production rates rose sharply in many industries, forestry, production, mining, power, and steel showed declines.

Number of pounds of steel produced was 1,000,000, an increase of 10 per cent over last year.

Production of steel was 1,000,000, an increase of 10 per cent over last year.

Production of steel was 1,000,000, an increase of 10 per cent over last year.

Production of steel was 1,000,000, an increase of 10 per cent over last year.

Guide of Alberta Home Ec Teachers

PROVINCE-WIDE supervision of intermediate and high school home economics classes adds up to a big day's work for Miss A. B. MacFarlane. Home ec. teachers across Alberta look to Miss MacFarlane for up-to-the-minute class aids as she travels from centre to centre.

90 University Girls Start Careers In Homemaking, Nutrition, Sewing

Why and wherefore of homemaking and nutrition is the business at hand for 90 household economics students at the University of Alberta.

During their three years of study, the co-eds become involved in everything from zoology to baking.

They don't learn everything from books because practical training is one of the most important parts of their work. They spend plenty of time in cooking and sewing labs and if they can't cook a scrumptious meal and sew a tidy seam by the end of their course, it isn't because they haven't tried.

Directs Careers of U of A House Ec'ers

WELL-KNOWN NAME in University and household economics circles across Canada is Miss Mabel Patrick. She heads the U of A household economics department and guides careers of graduate students. Miss Patrick's specialty is nutrition.

EDMONTON BULLETIN, Saturday, Oct. 15, 1949 23

Home Economics Research For Gracious Living Today

Women of today share the homemaking problems of women of yesterday. But today's problems are more easily solved with the advantage of years of specialized study on the parts of nutritionists, home designing experts, household economics scientists.

Women take greater pride in their homes than ever before with each gleaming gadget a proof of time's mastery of daily household problems.

Efficiency, artistry, imaginations, skill, daily planning are as necessary to a well-run home as they are to a well-run factory. A homemaker is considered as much of an expert as a highly trained engineer.

Charm, coziness and warmth and convenience of gracious living today is the result in part of work of women who make scientific study of household economics their life work.

Nutrition Problems Answered

HEALTH, WEALTH AND HAPPINESS are immediate concerns of public health nutritionist Miss Mabel Patrick. Working for the province of Alberta, Miss Patrick answers nutrition problems for homemakers, health teachers across the country.

Young Homemakers Learn Quickly

SUPERVISOR of home economics in city schools of Mrs. George Hamilton, right, shows pointed pupils of the small, old-fashioned, kitchening young women. Left, Mrs. Hamilton recently completed a household home economics lab at McKay Avenue school.

Edmonton Homemakers Seek Advice

MEAL-PLANNING, home decorating problems of women of Edmonton fall on the slight shoulders of district home economist Miss Ruth Whaley. Miss Whaley, a trained and experienced dietitian and home economist expert, gives valuable advice to homemakers on request.

CAC President Calls For More Enthusiastic Work

Canadian Association of Consumers, an active organization of homemakers across the country are striving for a better standard of living, moderation of prices, and increased quality of manufactured goods.

Mrs. F. C. Conroy, provincial president of CAC for Alberta, announces her disappointment in individual participation in Edmonton and district. An all-out effort must be made, says Mrs. Conroy, to reach the planned goals.

From the Edmonton Bulletin Ottawa Bureau

OTTAWA, Oct. 15.—The Government is getting ready to launch the purse strings on the big bonfire accumulated through the post-war surplus taxation policy.

For the past four years even taxation has built up a sizeable surplus estimated at \$2,000,000,000. Part of this has been used to cut down the public debt. Part is being held in reserve for a sharp decline in economic activity.

With an increase in unemployment from 87,000 to 141,000 in the past year, the government feels the time is fast approaching when the unemployment jump will be \$2,000,000,000. The government economists feel it may be a matter of time before the government will have to do all their own work.

AID MUNICIPAL SERVICES

First intention of the government's "unfettering" policy is the plan now being worked out to compensate municipalities for the loss of tax revenue from the federal government.

An interdepartmental committee representing all major departments of government is working out a formula that will apply on a percentage basis to the municipalities.

Most significant feature of the formula is that the amount of compensation municipalities will get is the service provided to that municipality by the government property in question.

For example, the government will maintain, in the case of a city, office, that the compensation to the municipality will be the same as the cost of the office to the government.

A resident office on the other hand would be similar to the amount of the compensation to the municipality for the office to the government.

MANY PROJECTS FILED

However, the government economists were quick to work out the details of the scheme, the more that they were working on it showed the government was getting ready to spend.

The government for some five years has been turning a deaf ear to the increasing demands for municipalities for compensation as government property across the country kept increasing.

The new formula was the first evidence of the government's intention to go half way at least.

It was also a sign the government might soon be ready to consider the so-called shift of public works projects piled up under the reconstruction department.

The first big project was the trans-Canada highway, and the government this session was paving the way for a start on the same.

VOLUNTEER WORKERS already have at started work on Glenora Community League's \$3,000 skating rink. With concrete foundation completed, community residents have set work for 10 a.m. tomorrow. Building will be 75 by 25 feet and finished in white stucco and brown stain. Upper floor will be glassed-in observation area. Glenora residents hope to pay for rink through current fund campaign.

Winnipeg Young Liberal To Head National Group

MONTREAL, Oct. 15.—(CP)—William Trebilcock of Winnipeg last night was elected president of the Young Liberal Federation of Canada on the second ballot at the group's third biennial convention here.

The national vice-president elected was Charles Durand of Montreal, immediate past president.

Mr. Trebilcock, an active worker in Manitoba Young Liberal activities, defeated Vernon Singer of Toronto, president of the Ontario Young Liberal Association, and Allan May of St. John's, national councillor from Edmonton.

The defeated candidates asked that the election be made unanimous.

A fourth candidate, Ed Panjo of Saint John, N.B., withdrew his name after the first ballot.

Miss Scullion and Ernest Morgan of Quebec were elected to accreditation as English secretary and French secretary respectively.

Howe Smith of Toronto was acclaimed treasurer after the second ballot when three other candidates—Donald Lankall, Vancouver; David Stanley, Toronto; and Allan May, St. John's—withdrew their names.

ELECTION UNANIMOUS

The defeated candidates asked that the election be made unanimous.

A fourth candidate, Ed Panjo of Saint John, N.B., withdrew his name after the first ballot.

Miss Scullion and Ernest Morgan of Quebec were elected to accreditation as English secretary and French secretary respectively.

Howe Smith of Toronto was acclaimed treasurer after the second ballot when three other candidates—Donald Lankall, Vancouver; David Stanley, Toronto; and Allan May, St. John's—withdrew their names.

VICE-PRESIDENTS

The provincial Young Liberal presidents automatically became national vice-presidents by virtue of amendment earlier today to the federation's constitution. The amendment raised the number of vice-presidents from three to 11. Besides the provincial presidents, the chairman of the Canadian University Liberal Federation is also a vice-president.

They include: Sam McGee, Vancouver; John Stewart, Edmonton; Gordon Blair, St. John's; and Benard Wolfe, Winnipeg.

Sam Cook of the University of Alberta, president of the CULF, is the 10th vice-president.

The federation rushed through 11 resolutions covering various topics from agriculture to crown corporations.

\$279 Million Gov't Surplus For 6 Months

OTTAWA, Oct. 15.—The federal government announced today that it had a surplus of \$279 million for the first six months of the fiscal year.

In the monthly revenue report issued today, Finance Minister Arthur Meighen stated that in the first half of the year, which ends next March 31, revenues were \$1,380,000,000 and expenditures \$1,101,000,000.

In the corresponding period of the 1948-49 fiscal year, revenues were \$1,314,000,000 and expenditures \$1,035,000,000 for a surplus of \$279,000,000.

\$15 MILLION DEFICIT

In September, revenues were \$173,900,000 and expenditures \$188,400,000, making a deficit of \$14,500,000. In the corresponding month of 1948, revenues totalled \$169,500,000 and expenditures \$184,000,000, for a deficit of \$14,500,000.

Mr. Meighen blamed the reduction in September revenues on the rate announced in the budget presented in the commons March 22. That budget provided for tax reductions retroactive to Jan. 1. While the changes were immediately put into effect, the budget was never ratified by parliament and Mr. Abbott, placed on retainer after the next March 31, Oct. 20.

In the original budget speech, Mr. Abbott forecast a surplus of \$275,000,000 for this year compared with a surplus of \$255,000,000 in the previous fiscal year.

New War Threat Faces Hong Kong

British Services Prepare Defences Of Crown Colony

The Red Tide in Asia creeps closer to Hong Kong every day. The British are not sure whether the Communists are planning to attack them there, but they are speeding preparations for defence. Those preparations are described in the following dispatch by the vice-president and general manager of the United Press, now on a tour of the Far East.

By Joseph L. Jones,
United Press Staff Correspondent

HONG KONG, Oct. 15.—(UP)—The British are going to defend Hong Kong against any assault, but they don't know whether the Chinese Communists will attack them or not.

"Of course, old boy, that's what I'm here for," the armistist said. "I wish I knew whether they were going to try."

When Canton falls, 40,000 troops here expect to go on "Phase 1"—a semi-alert or state of readiness with leaves limited to six hours.

TRAINING SPEEDED

They already have stepped up training and preparation. All arms are here—green-capped commandos, killed Scottish highlanders, wily little Gurkhas and tank regiments.

This afternoon, artillerymen were training with 4½-inch mobile field guns right in the centre of the city two blocks from the railway station. Where four trains daily speeded out fugitives from Canton all this week.

ARTILLERY SET

Crews said the field pieces have a range of 18,000 yards. That would be plenty to destroy from the paved roads around the Crown colony deep in to hills on the China side of the 30-mile land frontier.

A couple of squadrons of Spitfires are parked at the airport and an occasional spotter plane is visible on distant patrol.

The medium aircraft carrier Trident, in white hull and the cruiser Belfast, flagship of this naval station, heads a group of a half dozen destroyers plus smaller units pulled to the island-studded estuary of the Pearl River.

Steel booms up and down the river close all but guarded shipping channels against surface craft or submarines.

Anti-aircraft guns guard the airport and Observatory Hill. The rest of the military activity is tied up at docks or unloading freight onto lighters in mid-harbour.

NO HYSTERIA

Hong Kong itself is as busy as a small American town on Saturday afternoon. It shows no more sign of hysteria than the British House of Lords on a dull day.

The harbor between the island and Kowloon on the mainland is bustling with sampans and junkies, while the world's shipping is tied up at docks or unloading freight onto lighters in mid-harbour.

Godowns (warehouses) are stuffed with goods. Some, it is true, are goods destined for the China market which have not been moved either because of Communist advances or because of the Nationalist blockade of Communist-held ports.

But Hong Kong is prosperous from its current trade, although it has lost some of the edge of its boom.

Ten to 20 miles to the north, these Chinese troops are preparing a mobile defense in depth. It's not a fixed defense. There is no "little Maginot line" through the steep green hills and rice paddies. No pillboxes and the peaks as in the other Orientals hot spot, Southern Korea.

The last step Kowloon excitement, whose highest peak, Talmes, towers 3,500 feet, is a tough natural barrier to invasion. It is unchanged since the Japanese took Hong Kong on Christmas Day 1941, but otherwise the military situation is now quite different.

SOD TURNING ceremony gets up-to-date touch here as company officials watch dragline operate to start excavation of basement of new Canada Safeway Limited store at 109 street and 82 avenue. Another 100-foot frontage store is being started at Jasper avenue and 96 street. Two Safeway Stores will be as large as any west of Winnipeg.

CPR Claims Board Can't Halt Rate Boost

OTTAWA, Oct. 15.—(CP)—The Canadian Pacific Railway yesterday contended the board of transport commissioners has no power to stop the railways from hoisting freight rates on farm implements carried from central to western Canada.

Arguing for an increase that was suspended by the board last year, the railway claimed the commissioners have no jurisdiction over the particular rate change involved.

The Canadian National Railways joined the privately-owned line in arguing that the depressed farm implement rates are unfair to everyone except Canadian implement manufacturers and western farmers.

The railways were delivering final argument in support of their attempt to remove special low rates on westbound implements in effect for 30 years. The argument is continuing today.

OPPOSE INCREASE

Opposing the increase are the government of Alberta, the Canadian Federation of Agriculture, the Canadian Manufacturers' Association and the Canadian Federation of Equipment Dealers. It was their protest which brought suspension of the increase.

Argument in the case hinged on whether the disputed tolls are "competitive" rates—lowered specifically to meet competition. If they are, the railways may raise them as high as the normal levels without asking the board.

Opponents of the increase contended that the rates, which were placed in effect at the request of the federal government, are not competitive, even though they were dropped to the level of competing United States railway traffic out of Chicago.

SAID COMPETITIVE

Yesterday, CPR counsel, K. D. Spron, argued that the special rates were genuinely of the competitive type.

If the railways wanted to cancel them, he said, they could do so "without any consequences whatsoever." The board "has no jurisdiction under the railway act to order them continued."

The existing rates were "unjust and unreasonable," said Mr. Spron, not only to the railways but to other shippers who must pay higher tolls because of just-in-time railway revenue on farm implements.

Dealers In 'Peg May Ask Boost In Milk Price

WINNIPEG, Oct. 15.—(CP)—J. W. Speier, vice-president of the Winnipeg milk distributors' association, said yesterday the association will apply for a one-cent increase in retail milk prices unless their plan for six-day-a-week delivery in the city is accepted by local officials.

Mr. Speier was asking for five cents more that will be 12 per cent of the milk used in greater Winnipeg households.

The plan would make it necessary for housewives to place their Monday order for dairy products a day ahead. It was opposed by local 119 of the milk driver and dairy employees union (AFL) last year on the grounds that the men must work too hard on Saturday.

Shot At Bear, Kills Hunter Flashing Light

TRAIL, B.C., Oct. 15.—(CP)—Avery Blanchard of Renks, B.C., who allegedly mistook a flashlight beam for a reflection in a bear's eye, today was charged with manslaughter.

The charge follows the death of Jason Feir at Renks, Sept. 12, while hunting a bear which had been marauding outside in the Arnes Lake community.

At his preliminary hearing, Blanchard testified that he had mistaken Feir for the bear. Both parties were near blind darkness.

Western Canada's MASTER MOVERS
